## Referral Testing

Collected: 09/27/2023 11:05 Received: 09/27/2023 11:05

<u>Test Name</u>	<u>Result</u>	<u>Flag</u>	<u>Ref-Ranges</u>	<u>Units</u>	<u>Site</u>
Hemoglobin A1c	11.3	H			QCRL

Reference Range:  
<5.7 % of total Hgb

For someone without known diabetes, a hemoglobin A1c value of 6.5% or greater indicates that they may have diabetes and this should be confirmed with a follow-up test.

For someone with known diabetes, a value <7% indicates that their diabetes is well controlled and a value greater than or equal to 7% indicates suboptimal control. A1c targets should be individualized based on duration of diabetes, age, co-morbid conditions, and other considerations.

Currently, no consensus exist for use of hemoglobin A1c for diagnosis of diabetes for children.

Test Performed at:  
Quest Diagnostics Nichols Institute  
33608 Ortega Highway  
San Juan Capistrano, CA 92675-2042 I Maramica MD, PhD, MBA
