Referral Testing

Collected: 09/11/2023 14:04 Received: 09/11/2023 14:04

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Row 1: Oxalate, Plasma, 15.1, H, <=2.0, mcmol/L, MMRL

High value suggestive of Primary Hyperoxaluria. However, if the patient has chronic kidney disease (GFR<30 mL/min/1.73m2), plasma oxalate values up to 30 mcmol/L can be normal. The Mayo Clinic Hyperoxaluria Center is available to review case details and answer any questions regarding interpretation (hyperoxaluria center@mayo.edu; 800-270-4637) Sample was received nonacidified and frozen. In nonacidified samples oxalate values may increase spontaneously.

-----ADDITIONAL INFORMATION-----
This test has been modified from the manufacturer's instructions. Its performance characteristics were determined by Mayo Clinic in a manner consistent with CLIA requirements. This test has not been cleared or approved by the U.S. Food and Drug Administration.

Test Performed by:
Mayo Clinic Laboratories - Rochester Main Campus
200 First Street SW, Rochester, MN 55905
Lab Director: William G. Morice M.D. Ph.D.; CLIA# 24D0404292

Performing Site:
MMRL: MAYO MEDICAL REFERENCE LAB 3050 Superior Drive NW Rochester MN 55901

Reported Date: 2023.09.11 14:04

LAB: L - LOW, H - HIGH, AB - ABNORMAL, C - CRITICAL, . - NOT TESTED
