

LABORATORY REPORT

Example Client, XYZ123
1234 Warde Road
Ann Arbor MI 48108

EXAMPLE, REPORT
WX0000003826 F 12/05/1988

Collected: 12/28/2023 14:27

SHORTBCSF

Source: Cerebrospinal Fluid

Flow Cytometry Interpretation:

In summary, there is no immunophenotypic evidence of B cell neoplasia in the cerebrospinal fluid.

Morphology:

The sample has very low cellularity. The Wright stained cytospin contains too few nucleated cells for morphologic evaluation.

Comment :

Immunophenotyping by flow cytometry reveals that B-lymphocytes are rare to absent in the sample. Therefore, there is no evidence of a clonal or immunophenotypically abnormal B-lymphocyte population in the sample by this analysis.
