Volatiles Screen

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Rows include ETOH, Methanol, Isopropanol, and Acetone with their respective results and toxic levels.

Acetone levels greater than 50 mg/dL may indicate severe isopropanol poisoning.

The volatiles screen was performed on whole blood.

If applicable, any drug confirmation testing reported here was developed and the performance characteristics determined by Warde Medical Laboratory. This confirmation testing has not been cleared or approved by the FDA. The laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test is used for patient testing purposes. It should not be regarded as investigational or for research.
