

LABORATORY REPORT

Example Client, XYZ123
1234 Warde Road
Ann Arbor MI 48108

EXAMPLE, REPORT
WX0000072099 M 12/05/1988

Collected: 02/12/2020 19:49 Received: 02/12/2020 19:49

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Row 1: West Nile Virus Ab, IgG, 0.50, <1.30, Index, WMRL. Below the table: IgG NEGATIVE.

An index value of <1.30 indicates IgG antibodies to West Nile virus were not detected. The absence of IgG antibodies is presumptive evidence that the patient was not infected with West Nile virus or another flavivirus. However, the sample may have been drawn before antibodies were detectable, or the patient may be immunosuppressed. If infection is suspected, another sample should be drawn 7 - 14 days later and tested. Refer to the CDC guidelines for diagnosis of West Nile encephalitis.

Performing Site:

WMRL: Warde Medical Laboratory 300 West Textile Road Ann Arbor MI 48108 (800)876-6522

LAB: L - LOW, H - HIGH, AB - ABNORMAL, C - CRITICAL,
