Molecular

Collected: 03/23/2020 15:35 Received: 03/23/2020 15:35

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Row 1: SARS-CoV-2 Qualitative, Not detected, Not detected, WMRL.

This test was performed via the Abbott RealTime SARS-CoV-2 assay and has been authorized by FDA under an Emergency Use Authorization (EUA). The assay is validated for nasopharyngeal (NP) and oropharyngeal (OP) swabs in transport media. The limit of detection of the assay is approximately 100 copies per milliliter; however, detection of SARS-CoV-2 may be affected by the sample collection and transport methods, patient factors (e.g., presence of symptoms, and/or stage of infection), and a negative result does not rule out the possibility of infection. For updated information, refer to the Center for Disease Control website: www.cdc.gov/coronavirus.

Performing Site:

WMRL: WARDE MEDICAL LABORATORY 300 West Textile Road Ann Arbor MI 48108

LAB: L - LOW, H - HIGH, AB - ABNORMAL, C - CRITICAL, . - NOT TESTED

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Row 1: SARS-CoV-2 Qualitative, Inhibitory to PCR, AB, Not detected, WMRL

Inhibitory result. This specimen contains substances that interfere with PCR amplification of the nucleic acids. Interfering substances include, but are not limited to, heme, heparin and other chelating agents, detergents, complex polysaccharides, proteases, nucleases, and DNA binding proteins. Please consider sending another specimen for testing.
