Test Name	Result	Flag	Ref-Ranges	Units	Site
Squamous Cell Carcinoma, Serum	0.4		0.0-1.7	ng/mL	ARRL

INTERPRETIVE INFORMATION: Squamous Cell Carcinoma Antigen in Serum

This test is performed using the BRAHMS SCC Kryptor kit. Results obtained with different assay methods or kits cannot be used interchangeably. SCC Antigen levels alone should not be interpreted as evidence to the presence or absence of malignant disease. In patients with known or expected cancer, other tests and procedures must be considered for diagnosis and patient management. Elevated concentrations may also occur in benign conditions such as gynecological diseases, inflammatory lung disease, and liver or renal insufficiency.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Performed By: ARUP Laboratories
500 Chipeta Way
Salt Lake City, UT 84108
Laboratory Director: Tracy I. George, MD
