Amylase, Pancreatic Cyst

Collected: 08/18/2023 09:44 Received: 08/18/2023 09:44

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Row 1: Amylase, Pancreatic Cyst, <30, U/L, MMRL

A pancreatic cyst fluid amylase concentration of <250 U/L indicates a low risk of a pseudocyst and is more consistent with cystic neoplasms such as mucinous cystic neoplasms (MCN), intraductal papillary mucinous neoplasm (IPMN), serous cystadenomas, cystic neuroendocrine tumor, and mucinous cystadenocarcinoma. This clinical interpretation is only applicable to cyst fluid. For pancreatic sources other than cyst fluid clinical interpretation is not available.

This test result should be interpreted in the context of clinical presentation, imaging and cytology findings.

-----ADDITIONAL INFORMATION-----

This test has been modified from the manufacturer's instructions. Its performance characteristics were determined by Mayo Clinic in a manner consistent with CLIA requirements. This test has not been cleared or approved by the U.S. Food and Drug Administration.

The testing method is a substrate kinetic assay manufactured by Roche Diagnostics Inc. and performed on the Modular or Cobas system.

Values obtained with different assay methods or kits may be different and cannot be used interchangeably.

Test results cannot be interpreted as absolute evidence for the presence or absence of malignant disease.

Site PANCREAS MMRL

Test Performed by:
Mayo Clinic Laboratories - Rochester Superior Drive
3050 Superior Drive NW, Rochester, MN 55905
Lab Director: William G. Morice M.D. Ph.D.; CLIA# 24D1040592

Performing Site:
MMRL: MAYO MEDICAL REFERENCE LAB 3050 Superior Drive NW Rochester MN 55901

Reported Date: 2023.08.18 9:44 AMLPC

LAB: L - LOW, H - HIGH, AB - ABNORMAL, C - CRITICAL, . - NOT TESTED
