Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Rows include Aspergillus IgG Precipitins and various Aspergillus species gel diffusion tests.

The gel diffusion method was used to test this patient's serum for the presence of precipitating antibodies(IgG) to the antigens indicated. These antibodies are serological markers for exposure and immunological sensitization. The clinical significance varies, depending on the history and symptoms. *This test was developed and its performance characteristics determined by Eurofins Viracor. It has not been cleared or approved by the U.S. Food and Drug Administration.
