## Referral Testing

Collected: 08/24/2023 10:49

Received: 08/24/2023 10:49

<u>Test Name</u>	<u>Result</u>	<u>Flag</u>	<u>Ref-Ranges</u>	<u>Units</u>	<u>Site</u>
B- type Natriuretic Peptide	24		<=100	pg/mL	ARRL

INTERPRETIVE INFORMATION: B-Type Natriuretic Peptide  
 A cutoff of 100 pg/mL has been demonstrated to provide the maximal combination of sensitivity, specificity and negative predictive value for contributing to the diagnosis of congestive heart failure (CHF). A BNP value greater than 100 pg/mL is consistent with a diagnosis of CHF in the appropriate clinical setting. False positive results are more common in females greater than 75 years of age. Blood concentrations of natriuretic peptides may also be elevated in patients with myocardial infarction and in patients that are candidates for or are undergoing renal dialysis.

Performed By: ARUP Laboratories  
 500 Chipeta Way  
 Salt Lake City, UT 84108  
 Laboratory Director: Jonathan R. Genzen, MD, PhD

Performing Site:
