Referral Testing

Collected: 08/28/2023 11:33 Received: 08/28/2023 11:33

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Row 1: Trypanosoma cruzi (Chagas' Disease) Ab, IgG, NONREACTIVE, QCRL

REFERENCE RANGE: NONREACTIVE

The enzyme immunoassay for T. cruzi (Chagas disease) antibodies is sensitive and specific for acute or chronic American trypanosomiasis. However, crossreactivity may be observed in patients with leishmaniasis. If clinically warranted, a patient with a reactive result should have an additional sample collected and sent to your state public health laboratory to forward to CDC Parasitology for additional testing.
