## Clozapine

Test Name	Result	Flag	Ref-Ranges	Units	Site
CLOZAPINE	350		200-700	ng/mL	WMRL

Clozapine toxic level: >1000 ng/mL

NORCLOZAPINE	175	L	200-700	ng/mL	WMRL
--------------	-----	---	---------	-------	------

For Refractory Schizophrenia, at least 350 ng/mL of Clozapine should be achieved to evaluate efficacy. After response is achieved, reduce dose to minimum level needed to maintain remission. Seizure activity may occur with Clozapine levels over 600 ng/mL, but is unusual below 1000 ng/mL. The biological activity of Clozapine metabolites is not fully known and the toxic level is not well established. Typically, Norclozapine concentrations are similar to those of the parent Clozapine (+/- 50%).

If applicable, any drug confirmation testing reported here was developed and the performance characteristics determined by Warde Medical Laboratory. This confirmation testing has not been cleared or approved by the FDA. The laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test is used for patient testing purposes. It should not be regarded as investigational or for research.

Performing Site:

WMRL: Warde Medical Laboratory 300 West Textile Road Ann Arbor MI 48108 (800)876-6522
