Molecular

Collected: 09/02/2021 15:56 Received: 09/02/2021 15:56

Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Contains SARS-CoV-2 Qualitative test results.

This test was performed on the Abbott m2000 system. The limit of detection of the assay is approximately 100 copies per milliliter; however, detection of SARS-CoV-2 may be affected by the sample collection and transport methods, patient factors (e.g., presence of symptoms, and/or stage of infection).

Providers should refer to the fact sheets available at the following link:
http://www.wardelab.com/Abbott_COVID_test_fact_sheet_for_providers.pdf

Patients should refer to the fact sheets available at the following link:
http://www.wardelab.com/Abbott_COVID_test_fact_sheet_for_patients.pdf

This COVID-19 test uses reverse transcriptase polymerase chain reaction (RT-PCR) for the qualitative detection of nucleic acid from the SARS-CoV-2 virus. The test was performed at Warde Medical Laboratory according to protocols available under the US Food and Drug Administration's Emergency Use Authorization. The test is validated for nasal swabs self-collected at a health care location or collected by a healthcare worker, nasopharyngeal (NP) and oropharyngeal (OP) swabs collected by a healthcare worker, or bronchoalveolar lavage fluid (BAL) from patients suspected of COVID-19 by their health care provider. A negative result does not rule out the possibility of infection. For updated information, refer to the Center for Disease Control website: www.cdc.gov/coronavirus.

LAB: L - LOW, H - HIGH, AB - ABNORMAL, C - CRITICAL, . - NOT TESTED
