<u>Test Name</u>	<u>Result</u>	<u>Flag</u>	<u>Ref-Ranges</u>	<u>Units</u>	<u>Site</u>
Albumin, Pericardial Fluid	2.4400			g/dL	QCRL

Because of the wide range of Albumin levels seen in serous body fluids, results are best evaluated by using the serum-effusion albumin gradient (serum albumin result minus the serous body fluid albumin result) to differentiate whether the fluid is a transudate or an exudate.

A gradient value of > 1.2 g/dL is seen in transudates.  
A gradient value of < or = 1.2 g/dL is seen in exudates.
