Circulating Immune Complex, C3 Fragments 16 H <=15 ug Eq/mL ARRI

INTERPRETIVE INFORMATION: Circulating Immune Complex, C3 fragments

Many autoimmune disorders, chronic infections and malignancies are associated with circulating immune complexes. Quantitation of immune complexes assists in staging immunologic disorders. Detection of circulating immune complexes is not essential to any specific diagnosis. Circulating immune complexes may be found without any evident pathology and positive results do not necessarily implicate immune complex-related disease process. Values between 15 and 20 ug Eq/mL are considered equivocal for Circulating Immune Complex, C3 fragments assay. Repeat- testing using a new specimen is recommended, if clinically indicated. Performed By: ARUP Laboratories 500 Chipeta Way Salt Lake City, UT 84108

Laboratory Director: Tracy I. George, MD

Reported Date: 04/13/2022 17:55 CICC3
