Table with 6 columns: Test Name, Result, Flag, Ref-Ranges, Units, Site. Row 1: Protein S (Activity), 100, , 65 - 140, %, WMRL

Heparin levels up to 1 IU/mL do not affect test results; higher levels may cause false elevation. Thrombin inhibitors and direct oral anticoagulants may lead to over-estimation of protein S level by this assay. Note that measurement of protein S or free protein S antigen levels would be less affected by medication.
