Referral Testing

Collected: 09/13/2023 10:24 Received: 09/13/2023 10:24

<u>Test Name</u>	<u>Result</u>	<u>Flag</u>	<u>Ref-Ranges</u>	<u>Units</u>	<u>Site</u>
N-methyl-D-Aspartate Rcptr Ab, IgG, Ser					
N-methyl-D-Aspartate Receptor Ab, Serum	<1:10		<1:10		ARRL

Antibodies to NMDA were not detected, no additional testing to follow.

INTERPRETIVE INFORMATION: N-methyl-D-Aspartate Receptor Ab, Serum

Anti-NMDA receptor IgG antibody is found in a subset of patients with autoimmune limbic encephalitis and may occur with or without associated tumor. Decreasing antibody levels may be associated with therapeutic response; therefore, clinical correlation must be strongly considered. A negative test result does not rule out a diagnosis of autoimmune limbic encephalitis.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
