## Referral Testing

Collected: 02/13/2024 08:25 Received: 02/13/2024 08:25

Test Name	Result	Flag	Ref-Ranges	Units	Site
<b>Porphyryns, Fecal</b>					
Coproporphyrin, Feces	47	H	0-45	nmol/g	ARRL
Protoporphyrin, Feces	110	H	0-100	nmol/g	ARRL

This test is useful for differentiation of acute porphyrias following a positive porphobilinogen (PBG), or diagnosis or strong suspicion of acute porphyria. Fecal porphyrin excretion usually is not elevated in acute intermittent porphyria (AIP), but massive increases of fecal coproporphyrin are seen in hereditary coproporphyrin (HCP). Fecal protoporphyrin and coproporphyrin excretion is increased in variegate porphyria (VP). This fecal porphyryns assay is not a screening test. Total porphyryns are not measured. For additional information, access the Porphyrias topic in ARUP Consult (arupconsult.com).

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Porphyrin Fecal Interpretation **Negative** ARRL

Performed By: ARUP Laboratories  
500 Chipeta Way  
Salt Lake City, UT 84108  
Laboratory Director: Jonathan R. Genzen, MD, PhD  
CLIA Number: 46D0523979
