<u>Test Name</u>	<u>Result</u>	<u>Flag</u>	<u>Ref-Ranges</u>	<u>Units</u>	<u>Site</u>
Phospho-Tau 217, Plasma	Negative		Negative		ARRL

Clinical Interpretation: The pTau217 concentration was <0.07 U/mL. A test result reported as negative is consistent with absence of amyloid deposition in brain as detected by amyloid PET scan. A negative result reduces the likelihood that a patient's cognitive impairment is due to Alzheimer's Disease.

INTERPRETIVE INFORMATION: pTau 217

The Phospho-Tau 217, Plasma test is intended for use in patients aged 60 years and older who present with cognitive impairment and who are being evaluated for Alzheimer's disease and other causes of cognitive decline.

Limitations: Plasma phospho-Tau 217 must be interpreted in conjunction with other patient clinical information. It is not intended to be used as a screening test or stand-alone diagnostic test and is not intended for therapeutic monitoring. Results obtained with different assay methods or kits cannot be used interchangeably.

For complete description of the cutoffs and interpretive guidance please refer to: ltd.aruplab.com/Tests/Pub/3019017

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. This test was performed in a CLIA-certified laboratory and is intended for clinical purposes.
