

Test Dropdown

The test updates listed on the dropdown will be divided into two categories: Individual Test Updates and Test Directory Updates. On the Individual Test Updates page, you can find updates by individual test. The Test Updates option will route you to the Test Updates' page where you will find the standard scheduled updates you are used to seeing, usually monthly.

Individual Test Updates Page (New feature)

By following the Individual test updates drop down link, you will be able to search for individual updates to tests to see when and what changes were made

Below you will find an example image of an individual test update search display.

A screenshot of the 'Test Updates' page. The header is purple with the text 'Test Updates' in white. Below the header is a search section titled 'Find Test Updates'. It includes a search bar with a magnifying glass icon, a 'Filter by Effective Date' section with 'Start date' and 'End date' fields and calendar icons, and a 'Filter by update type' section with four checkboxes: 'New Test', 'Inactivated/Replace Test', 'Inactivated Test', and 'Updated Test'. To the right of the search section is a 'Need Help?' box with a blue 'Contact Us' button. Below the search section, it shows '2335 Results' and 'Results per page 10'. There are two test update cards. The first card is for 'BNPAR - "B- type Natriuretic Peptide"' with an effective date of '08/25/2026', test code 'BNPAR', and update type 'Inactivated Test'. The second card is for 'PETCB - "Phosphatidylethanol Confirmation, Blood" replaced by PETHC - "Phosphatidylethanol, Blood"' with an effective date of '08/25/2026', test code 'PETHC', and update type 'Inactivated/Replace Test'. On the right side of the page is a 'Resources' sidebar with four items: 'Interpretation Guides & Forms', 'Education', 'Specimen Collection and Transport', and 'Order Supplies'.

Search by test name or test code:

On this page, you can search by test name or test code to find any pertinent updates to a specific test that occurred from 2022 until now.

Search for test updates that occurred within a time frame:

Use the “*Filter by Effective Date*” drop downs to select a date range

Test Directory Updates (New look)

By selecting the Test Directory Updates page in the under Tests, you will be directed to Monthly Test Update page. This page will have a new design, but our directory updates can be viewed going back to 2022. Please look below for a preview of the new and improved test update page:

07/17/2026	Updated Test	MYCM – "Mycoplasma IgM Ab"	Jump to update ↓

Update Types Organized in New Format

Update types in each Test Directory Update have been renamed and appear in the following formats:

New Test:

These entries are for an entirely new test offering. The update will provide a detailed breakdown of the new test requirements, listing and interface map.

Inactivated/Replacement Test:

These entries will be utilized when a current test is inactivated and replaced by a new test offering at Warde. You can expect to find the current Test code, ordering code, and CPT-4 of the soon-to-be inactivated test followed by all information for the new replacement test.

Inactivated:

Entries of this type are to communicate tests that will be inactivated as of a certain date. The test directory update will include the Test code, ordering code, and CPT-4 Code of the affected test along with any relevant notes concerning reason for inactivation.

Updated:

Entries of this sort are simply to communicate changes to the listing for that test on our

website. The test directory update will include the test code, ordering code, and CPT-4 Code of test being changed as well as the comparison of changes.

Communication Banners for each updated test

After a test has been updated, a communication banner will be placed on that test's webpage on the Test Catalog. You will find these new communication banners reflected under the test title. Please see an example of how these banners will appear below:
